Hindi

PROJECTS

1. RFID - BASED SMART CATTLE TRADING & MANAGEMENT

An advanced app for cattle trading and management using RFID tags
This app helps buyers and sellers track cattle details , health records
And market prices.

2. VIRTUAL AI PET (companion app)

A smart AI-powered virtual pet that interacts, learns, and requires care

This app allows users to **adopt and interact with an AI pet** that learns behaviors, responds to emotions, and requires care like feeding and playing.
The virtual pet **expresses emotions, remembers past interactions, and engages in mini-games**. Users can also train their pet to learn new phrases and tricks.

3. ECHOMIND-AI SELF-TALK COMPANION

An AI-powered self-talk simulator for overthinkers and lonely individuals

This app acts as a **virtual emotional support system**, allowing users to **express thoughts, track emotions, and receive personalized recommendations**. It analyzes user sentiment and provides **uplifting content** such as music, movies, and activities. The app also features a **secret messaging system** that notifies trusted contacts when a user is feeling extremely low.
